Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Harold C. Moore on February 16, 2004.

The application has been amended as follows:

Delete Claims 1-16.

In Claim 17, line 7, delete "icruity"

And insert – circuitry --.

In Claim 27, line 1, delete "A method of fabricating a semiconductor wafer,"

And insert – The method of claim 17, further -- .

Allowable Subject Matter

Claims 17 and 19-28 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art known to the Examiner is cited in the previous Office Action. Smesny does not teach or suggest measuring pressure with a pressure measurement device that includes a capacitor and a capacitance measurement unit electrically coupled to the capacitor. Smesny instead suggests that sensors may be implemented to measure pressure conditions on a semiconductor, wherein the pressure sensors may comprise transducers that include resistive circuits. Fisher suggests that separately formed sensors are not suitable for use in wafers that incorporate additional conversion and processing circuitry for the pressure measurements. As argued by Applicants' "because Fisher only teaches the use of capacitative pressure sensors that are separately fabricated, the resulting teaching of Fisher is that capacitive pressure sensors are not suitable for wafers that include other circuitry that assists in obtaining or processing the measured pressure information. Because Smesny teaches a circuit that employs such other circuitry, including a signal conditioning circuit and a processor, Fisher would only suggest, if anything, the use of integrally formed, non-capacitive sensors, and not separately fabricated capacitive sensors. " Therefore, there is no motivation, except impermissible hindsight, to combine the two references, and the claims at hand are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander G. Ghyka whose telephone number is (571) 272-1669. The examiner can normally be reached on Monday through Thursday during regular business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John F Niebling can be reached on (571) 272-1679. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
